

## **Government Degree College**

Tuni, Kakinada District.

### **Innovative Startup Ventures**

Entrepreneurship takes many forms, but the aims and objectives of entrepreneurship in education are all about focused development. Entrepreneurs need certain traits and skills, business acumen and financial literacy, as well as an entrepreneurial mindset. We encourage students to become entrepreneurs.

Department of Computer science, at Govt. Degree College(A), Tuni is encouraging innovation among students. Every year students comes up with various ideas. We brainstorm those ideas and select one best idea. After this they are provided financial support from us for domain name registration. Along with this we are guiding them to have a free account on “freehosting.com” hosting platform for their application hosting. This free hosting platform helps them to set up the application at the inception to host the pilot or demo version. We continuously helping them to develop web portal as per their requirement and also help them in hosting that application in real time. Latter on once their idea gets popular, they can move their application to commercial hosting.

[Etukas.com](http://www.etukas.com)

This application named <http://www.etukas.com> created by our student with our support. This application generated good revenue for our students and provided quality building construction material such as sand, bricks, cement, iron, steel at an affordable price to the rural people. This application also provides connects the daily wage workers in rural villages to the real estate construction fields in urban and semi urban areas.

[www.etuka.in](http://www.etuka.in) - online platform for selling construction material online. This has been given to final year students during the year 2019.
